VLAD

SPEAKING TEST COMMENTS

Criteria	Mark	Comments
Task Fulfilment & Communicative Effect	7	All tasks were completed with ease and, at times, confidence. The message was communicated mostly clearly and almost always in a natural manner. Misunderstandings were very rare. Contributions were always relevant and often fully detailed.
Coherence	6	Use of language was mostly clear and structured. Ability to speak at length was displayed. However, sometimes there were hesitations which caused coherence to break down. Linking words and phrases were used mostly effectively.
Accuracy & Range of Grammar	6	There was a range of grammatical structures. Some errors occurred but were repaired or did not impact in a major way on meaning. There was very good control of basic structures. Complex structures were attempted but errors occurred, and re-starts were necessary. Meaning was almost always clear despite errors.
Accuracy & Range of Vocabulary	6	A good range of vocabulary was used. The selected vocabulary was clear, though not always appropriate. Despite some errors in usage and word formation, they did not prevent understanding. Re-starts/re-wordings were rare.
Pronunciation, Intonation & Fluency	6	Pronunciation was reasonably clear and easily understood. The read aloud task was completed with a good degree of fluency.
